CONTENTS OF VOLUME 233

NUMBER 1, August 15, 1984

COMMUNICATION

Change in Kinetic Property of M_1-Type Pyruvate Kinase from Hyperbolic Type to Sigmoidal Type by Limited Proteolysis with an Acid Fraction from Rabbit Liver *Yutaka Fujii, Kyoichi Kobashi, and Noboru Nakai* 310

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Improvement of the Anoxia-Induced Mitochondrial Dysfunction by Membrane Modulation *Masanobu Miyahara, Eiji Okimasu, Hiroaki Mikasa, Shigeo Terada, Hiroyuki Kodama, and Kozo Utsumi* 139

The Effect of Phenothiazines on Ca^{2+} Fluxes in Skeletal Muscle Sarcoplasmic Reticulum *Pompeo Volpe, Brian Costello, Alice Chu, and Sidney Fleischer* 174

Evidence for a Radical Mechanism of Halogenation of Monochlorodimedone Catalyzed by Chloroperoxidase *Brenda Walker Griffin and Patricia L. Ashley* 188

ENZYME MECHANISMS AND METABOLISM

Ketone Body Synthesis from Leucine by Adipose Tissue from Different Sites in the Rat *Yu-Yan Yeh* 10

Effects of Ligands and pH on the Reactions of Aspartate Aminotransferase with Aminooxyacetate and Hydroxylamine *Raimo P. Raunio, Raija K. Lindberg, and W. Terry Jenkins* 43

The Isolation of a Peptidyl Dipeptidase from Mouse Brain Cytosol That Cleaves Adrenocorticotropic Hormone-(7–10) and Des-tyrosine-Enkephalins *A. Neidle and J. A. Kelly* 115

Purification of Two Forms of Kanamycin Acetyltransferase from *Escherichia coli* *Kesavan Radika and Dexter B. Northrop* 272

GLYCOPROTEINS AND GLYCOLIPIDS

Studies on *Turbatrix aceti* β-*N*-Acetylglucosaminidase. 1. Purification and Physicochemical Characterization *Gurrinder S. Bedi, Ramesh H. Shah, and Om P. Bahl* 237

Studies on *Turbatrix aceti* β-*N*-Acetylglucosaminidase. 2. Kinetic Studies on the Active Site *Gurrinder S. Bedi, Ramesh H. Shah, and Om P. Bahl* 251

HORMONE STRUCTURE AND FUNCTION

Heterogeneous Response of Isolated Adult Rat Heart Cells to Insulin *Robert A. Haworth, Douglas R. Hunter, and Herbert A. Berkoff* 106

6-Fluoro-Vitamin D_3: A New Antagonist of the Biological Actions of Vitamin D_3 and Its Metabolites Which Interacts with the Intestinal Receptor for $1\alpha,25(OH)_2$-Vitamin D_3 *Francois Wilhelm, William G. Dauben, Boris Kohler, Alex Roesle, and Anthony W. Norman* 127

Conformational Comparison of Human Pituitary Growth Hormone and Human Chorionic Somatomammotropin (Human Placental Lactogen) by Second-Order Absorption Spectroscopy *Thomas A. Bewley and Choh Hao Li* 219

Pancreatic Vitamin D-Dependent Calcium Binding Protein: Biochemical Properties and Response to Vitamin D *Seizo Kadowaki and Anthony W. Norman* 228

IMMUNOLOGY

Lewis Blood Group Antigens Defined by Monoclonal Anti-colon Carcinoma Antibodies *Magdalena Blaszczyk, Gunnar C. Hansson, Karl-Anders Karlsson, Goran Larson, Nicklas Stromberg, Jan Thurin, Meenhard Herlyn, Zenon Steplewski, and Hilary Koprowski* 161

A New Cold Agglutinin from *Achatina fulica* Snails *Manju Sarkar, Bimal Kumar Bachhawat, and Chitra Mandal* 286

LIPIDS AND PROSTAGLANDINS

Prostaglandin Receptors in Rat Kidney *Catherine Limas and Constantinos J. Limas* 32

Effects of Detergents on the Lecithin:Cholesterol Acyltransferase Reaction *Myung C. Park, Walter J. McConathy, and Andras G. Lacko* 290

MOLECULAR GENETICS, DEVELOPMENTAL BIOCHEMISTRY, AND DIFFERENTIATION

Glucose Requirement for Induction by Sodium Butyrate of the Glycoprotein Hormone α Subunit in HeLa Cells *Daniel S. McClure and G. Stanley Cox* 93

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Cytochrome *P*-450-Dependent Oxidation of Progesterone, Testosterone, and Ecdysone in the Spiny Lobster, *Panulirus argus* *Margaret O. James and Kathleen T. Shiverick* 1

Spectrophotometric Assay of the Flavin-Containing Monooxygenase and Changes in Its Activity in Female Mouse Liver with Nutritional and Diurnal Conditions *Aparna Dixit and Thomas E. Roche* 50

Studies on Cytochrome *P*-450-Dependent Lipid Hydroperoxide Reduction *Terry D. Lindstrom and Steven D. Aust* 80

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

Studies on the Relation of the M_r 9000 Phosphoprotein to Cytochrome *b*-559 in Spinach Thylakoid Membranes *William R. Widger, Joseph W. Farchaus, William A. Cramer, and Richard A. Dilley* 72

PROTEIN STRUCTURE AND FUNCTION

NMR Investigation of the Charge Isomers of Bovine Myelin Basic Protein *Sela Cheifetz, Mario A. Moscarello, and Charles M. Deber* 151

Molecular Organization of 19 S Calf Thyroglobulin
Giuseppe Palumbo and Mario F. Tecce 169
A Chemical and Physical Comparison of Ferritin Subunit Species Fractionated by High-Performance Liquid Chromatography *James F. Collawn, Jr., Pauline Y. Lau, Stephen L. Morgan, Alvin Fox, and Wayne W. Fish* 260
Conformational Studies on the Inactivation of Glyceraldehyde-3-phosphate Dehydrogenase from the Facultative Thermophile *Bacillus coagulans* KU
James H. McLinden, Kin-Ping Wong, Archie L. Murdock, and Remi E. Amelunxen 299

PROTEOLYSIS AND PROTEIN TURNOVER

pH Dependence of Salt Activation of Human Leukocyte Elastase
Genichiro Oshima, Katsuhiko Akashi, and Michiyuki Yamada 212
Binding of Monoclonal Antibody to Cathepsin M Located on the External Surface of Rabbit Lysosomes *S. Pontremoli, E. Melloni, G. Damiani, M. Michetti, F. Salamino, B. Sparatore, and B. L. Horecker* 267

REGULATION OF METABOLISM AND OF ENZYME ACTION

Dephosphorylation and Inactivation of Phosphorylase Kinase: Subunit Specificity of Rabbit Skeletal Muscle Protein Phosphatases
Mahrukh K. Ganapathi and Ernest Y. C. Lee 19
The Effects of Insulin and Glucose on the Induction and Intracellular Translocation of δ-Aminolevulinic Acid Synthase
Richard J. DeLoskey and Diana S. Beattie 64
Electrostatic Control of Enzyme Reactions: The Mechanism of Inhibition of Glucose Oxidase by Putrescine *Judith G. Voet and Ellen C. Andersen* 88
Interaction of Polyamines and Magnesium with Casein Kinase II
Gary M. Hathaway and Jolinda A. Traugh 133
Properties and Subcellular Localization of Adenosine Diphosphatase in Rat Heart
Jan de Vente, Johan Velema, and Johan Zaagsma 180
Glucagon and Fasting Do Not Activate Peroxisomal Fatty Acid β-Oxidation in Rat Liver *Richard W. Slauter and Russell K. Yamazaki* 197
The Anabolic Effects of Insulin on Type II Collagen Synthesis of Swarm Rat Chondrosarcoma Chondrocytes *M. E. Bembenek and J. P. Liberti* 203

NUMBER 2, September 1984

COMMUNICATION

Cyclization of Farnesyl Pyrophosphate to the Sesquiterpene Olefins Humulene and Caryophyllene by an Enzyme System from Sage (*Salvia officinalis*)
Rodney Croteau and Afaf Gundy 838

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

H^+ Stoichiometry of Sites 1 + 2 of the Respiratory Chain of Normal and Tumor Mitochondria
Antonio Villalobo, Adolfo Alexandre, and Albert L. Lehninger 417

Rate Control of Phosphorylation-Coupled Respiration by Rat Liver Mitochondria
E. Jack Davis and Wil I. A. Davis-Van Thienen 573
Source of the Oxygen Atoms of Nitrate in the Oxidation of Nitrite by *Nitrobacter agilis* and Evidence against a P-O-N Anhydride Mechanism in Oxidative Phosphorylation *Thomas C. Hollocher* 721
The Role of Hydroperoxides as Calcium Release Agents in Rat Brain Mitochondria
Jorgina Satrustegui and Christoph Richter 736
Redox State of Cytochrome *C* in the Presence of the 6-Hydroxydopamine/Oxygen Couple: Oscillations Dependent on the Presence of Hydrogen Peroxide or Superoxide *Allan J. Davison and Pauline Gee* 761
Reconstitution of the Lipid-Depleted Pyruvate Oxidase System of *Escherichia coli:* The Palmitic Acid Effect *Kan Kiuchi and Lowell P. Hager* 776

COENZYMES

In Vitro Reconstitution of Nitrate Reductase Activity of the *Neurospora crassa* Mutant *nit-1:* Specific Incorporation of Molybdopterin
Steven Kramer, Robert V. Hageman, and K. V. Rajagopalan 821

ENZYME MECHANISMS AND METABOLISM

pH Kinetic Studies of the *N*-Demethylation of *N,N*-Dimethylaniline Catalyzed by Chloroperoxidase *Gregory L. Kedderis and Paul F. Hollenberg* 315
Pre-Steady-State Kinetics of Beef Heart Mitochondrial ATPase
David D. Clark, Stephen G. Daggett, and Sheldon M. Schuster 378
Covalent Binding of Folic Acid to Dimethylglycine Dehydrogenase
Conrad Wagner, William T. Briggs, and Robert J. Cook 457
Formation of β,γ-Methylene-7,8-dihydroneopterin 3′-Triphosphate from β,γ-Methyleneguanosine 5′-Triphosphate by GTP Cyclohydrolase I of *Escherichia coli* *J. Ferre and K. Bruce Jacobson* 475
Inactivation of Rat Ovarian 20α-Hydroxysteroid Dehydrogenase by *N*-Alkylmaleimides *Piamsook Pongsawasdi and Bruce M. Anderson* 481
Fructose-1,6-Bisphosphate Aldolase from Rabbit Muscle: Different Catalytic Behavior of the Dihydroxyacetone Phosphate Binding Sites at Low Temperature
Enrico Grazi and Giorgio Trombetta 595
Reactions of the Sulfhydryl Groups of Alanyl-tRNA Synthetase
Zhang-Qun Chen, Jung-Ja Park Kim, C.-S. Lai, and Alan H. Mehler 611
Kinetics of Carbonic Anhydrase Catalysis in Solvents of Increased Viscosity: A Partially Diffusion-Controlled Reaction *Brian B. Hasinoff* 676
Kinetic Studies of Fructokinase I of Pea Seeds
Les Copeland, Stuart R. Stone, and John F. Turner 748
Inhibition of ATPase Activity of the recA Protein by ATP Ribose-Modified Analogs
Yuji Karasaki and Ken Higashi 796

GLYCOPROTEINS AND GLYCOLIPIDS

Biochemical, Immunological, and Structural Studies on a Sphingolipid Activator Protein (SAP-1) *Koji Inui and David A. Wenger* 556

HORMONE STRUCTURE AND FUNCTION

Biological Activity Assessment of the 26,23-Lactones of 1,25-Dihydroxyvitamin D_3 and 25-Hydroxyvitamin D_3 and Their Binding Properties to Chick Intestinal Receptor and Plasma Vitamin D Binding Protein
Francois Wilhelm, Eberhard Mayer, and Anthony W. Norman 322

Colchicine Inhibition of Insulin Induction of Stearoyl-CoA Desaturase and Fatty Acid Synthetase in Cultured Avian Liver Explants
Ranganna Kasturi, Vasudev C. Joshi, and Salih J. Wakil 530

Salinity Adaptation in Fish: Effect of Thyroxine on Mitochondrial Status
K. Shivakumar and J. Jayaraman 728

Thymosin β_{11}: A Peptide from Trout Liver Homologous to Thymosin β_4
Susan Erickson-Viitanen and B. L. Horecker 815

IMMUNOLOGY

Monoclonal Antibodies PMN 6, PMN 29, and PM-81 Bind Differently to Glycolipids Containing a Sugar Sequence Occurring in Lacto-*N*-Fucopentaose III
John L. Magnani, Edward D. Ball, Michael W. Fanger, Sen-Itiroh Hakomori, and Victor Ginsburg 501

LIPIDS AND PROSTAGLANDINS

Cytoplasmic Location of Linoleoyl-CoA Desaturase in Microsomal Membranes of Rat Liver *Yutaka Fujiwara, Teruo Ishibashi, and Yoh Imai* 402

Effects of Dietary Polyunsaturated Fats and Vitamin E on Aging and Peroxidative Damage to DNA *Frank W. Summerfield and Al L. Tappel* 408

Release of Ethane and Pentane from Rat Tissue Slices: Effect of Vitamin E, Halogenated Hydrocarbons, and Iron Overload
Victor C. Gavino, Cora J. Dillard, and Al L. Tappel 741

Studies of the Reactivity of HO_2/O_2^- with Unsaturated Hydroperoxides in Ethanolic Solutions *Michael J. Thomas, Mark W. Sutherland, Ravindra L. Arudi, and Benon H. J. Bielski* 772

MEMBRANES, CELL SURFACES, AND RECEPTORS

Free Fatty Acids and (Na^+,K^+)-ATPase: Effects on Cation Regulation, Enzyme Conformation, and Interactions with Ethanol *Alan C. Swann* 354

Heparan Sulfate Proteoglycans of Human Neuroblastoma Cells: Affinity Fractionation on Columns of Platelet Factor-4^+
Grace A. Maresh, Ellen A. G. Chernoff, and Lloyd A. Culp 428

Effect of Sulfhydryl Reagents on Nucleoside Transport in Cultured Mammalian Cells *Peter G. W. Plagemann and Robert M. Wohlhueter* 489

Degradation of Surface-Labeled Hepatoma Membrane Polypeptides: Effect of Inhibitors *James F. Hare and Michael Huston* 547

Ethanol Increases Calcium Permeability of Heavy Sarcoplasmic Reticulum of Skeletal Muscle
S. Tsuyoshi Ohnishi, Jeffrey L. Flick, and Emanuel Rubin 588

Studies Concerning a GTP Regulatory Subunit of Rat Luteal Adenylate Cyclase
Patrick J. McIlroy and Elizabeth R. Bergert 652

MOLECULAR GENETICS, DEVELOPMENTAL BIOCHEMISTRY, AND DIFFERENTIATION

Tissue Specificity of 3′-Untranslated Sequence of Myosin Light Chain Gene: Unexpected Interspecies Homology with Repetitive DNA
Chandrika Saidapet, Pramod Khandekar, Charmaine Mendola, and M. A. Q. Siddiqui 565

Monoclonal Antibody A2B5 Reacts with Many Gangliosides in Neuronal Tissue
Pam Fredman, John L. Magnani, Marshall Nirenberg, and Victor Ginsburg 661

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Mitochondrial—Microsomal Interactions *in Vitro:* Use of Microsomal 7-Ethyoxycoumarin *O*-Deethylase to Study Succinate-Stimulated Malate Efflux from Mitochondria
W. David Holtzclaw, Ronald G. Thurman, and Frederick C. Kauffman 345

Rat Hepatic Cytochrome *P*-450 Isozyme Specificity for the Metabolism of the Steroid Sulfate, 5α-Androstane-3α,17β-diol-3,17-disulfate
Dene E. Ryan, Ross Dixon, Ralph H. Evans, Lata Ramanathan, Paul E. Thomas, Alexander W. Wood, and Wayne Levin 636

PHYSICAL BIOCHEMISTRY

Size, Shape, and Hydration of a Self-Associating Human IgG Myeloma Protein: Axial Asymmetry as a Contributing Factor in Serum Hyperviscosity
Craig G. Hall and George N. Abraham 330

Calorimetric Study of Carbohydrate Binding to Concanavalin A
Gerhard R. Munske, Henry Krakauer, and James A. Magnuson 582

Correlations among Parameters that Describe Low-Spin Ferric Heme Complexes
Barry B. Muhoberac 682

An Electron-Nuclear Double-Resonance Study of Methanol Dehydrogenase and Its Coenzyme Radical *J. A. Duine, J. Frank. Jzn., and R. De Beer* 708

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

Conversion of Glycerate to Serine in Intact Spinach Leaf Peroxisomes
Zheng Liang, Charles Yu, and Anthony H. C. Huang 393

Oxime Formation between α-Keto Acids and L-Canaline *Arthur J. L. Cooper* 603

Enolase Isozymes from *Ricinus communis:* Partial Purification and Characterization of the Isozymes *Jan A. Miernyk and David T. Dennis* 643

PROTEIN STRUCTURE AND FUNCTION

Inhibition of Activated Porcine Factor IX by Dansyl-Glutamyl-Glycyl-Arginyl-Chloromethylketone *Pete Lollar and David N. Fass* 438

Conformation-Specific Precipitation of Human α_2-Macroglobulin by Divalent Zinc or Calf Thymus Histone H3 *Steven L. Gonias, Steven R. Feldman, Charlotte W. Pratt, and Salvatore V. Pizzo* 462

The Phosphorylation Site for Casein Kinase II on 20,000-Da Light Chain of Gizzard Myosin
Yuko Tashiro, Sueo Matsumura, Noriko Murakami, and Akira Kumon 540

Atrial Tissue Contains a Metallo Dipeptidyl Carboxyhydrolase Not Present in Ventricular Tissue: Partial Purification and Characterization
Robert B. Harris and Irwin B. Wilson 667

The Role of Tryptophan Residues in Heparin–Antithrombin Interactions
George I. Karp, James A. Marcum, and Robert D. Rosenberg 712
The Dissociation of the Extracellular Hemoglobin of *Tubifex tubifex* at Extremes of pH and Its Reassociation upon Return to Neutrality
G. Polidori, M. Mainwaring, T. Kosinski, C. Schwarz, R. Fingal, and S. N. Vinogradov 800

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

The Proteinase Inhibitors Leupeptin, Pepstatin A, and TLCK Cause Reduced Collagen Production in Freshly Isolated Embryonic Chick Fibroblasts in Suspension Culture *Donald S. Neblock and Richard A. Berg* 338
Rat Major Acute-Phase Protein: Biosynthesis and Characterization of a cDNA Clone *Kathleen P. Anderson, Anna D. Martin, and Edward C. Heath* 624

REGULATION OF METABOLISM AND OF ENZYME ACTION

The Regulation of Hepatic Gluconeogenesis Using α-Ketoisovalerate and Propionate as Precursors
Tarun B. Patel, David S. Lapointe, and Merle S. Olson 362
Glycerolipid Biosynthesis in Rat Adipose Tissue 12. Properties of Mg^{2+}-Dependent and -Independent Phosphatidate Phosphohydrolase
Subhash C. Jamdar, Linda J. Osborne, and Gary N. Wells 370
Occurrence of Multiple Forms of Alcohol Dehydrogenase in *Penicillium* Supplemented with 2,3-Butanediol *Pat J. Langston-Unkefer and John E. Gander* 447
Mode of Action of Natural Inactivator Proteins from Corn and Rice on a Purified Assimilatory Nitrate Reductase
Larry P. Solomonson, William D. Howard, Tomoyuki Yamaya, and Ann Oaks 469
Purine Metabolism and Urate Biosynthesis in Isolated Chicken Hepatocytes
Robert A. Burns and Peter J. Buttery 507
Control of the Purine Nucleotide Cycle in Extracts of Rat Skeletal Muscle: Effects of Energy State and Concentrations of Cycle Intermediates
John P. Manfredi and Edward W. Holmes 515
The Long-Term Effect of Glucagon on Pyruvate Kinase Activity in Primary Cultures of Hepatocytes
Claudia Evans, Osamu Miyanaga, and G. Larry Cottam 617
Guanosine Triphosphate and Colchicine Affect the Activity and the Polymeric State of Acetyl-CoA Carboxylase
Kenneth F. Buechler and David M. Gibson 698
Purification of *S*-Adenosyl-L-homocysteine Hydrolase from *Dictyostelium discoideum:* Reversible Inactivation by cAMP and 2′-Deoxyadenosine
R. J. Hohman, M. C. Guitton, and M. Véron 785
5-Bromo-2′-Deoxyuridine Induces Placental Alkaline Phosphatase Biosynthesis in Cultured Choriocarcinoma Cells
Fumiyuki Ito, Adam D. Sartwell, and Janice Yang Chou 830
AUTHOR INDEX FOR VOLUME 233 842

The Subject Index for Volume 233 will appear in the December 1984 issue as part of a cumulative index for the year 1984.

Digitized by the Internet Archive
in 2026

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1980. Please note the following examples.

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **195,** 255–260.
2. Metzler, D. E. (1977) Biochemistry: The Chemical Reaction of Living Cells, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) *in* The Proteins (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
